This quiz is out of 10 points, as usual.

Demonstrate your understanding of a concept or problem-type that you studied in preparation for Exam 1, but which *did not appear* on the exam. You may refer to your notes and/or textbook for this quiz.

Both abstract (e.g. write about the theoretical framework of some concept and/or about why is it useful/important) and concrete (e.g. work out a detailed solution to some illustrative example) answers will be accepted, but a combination of the two will give you the best chance to receive full credit.

You have 15 minutes...
